Cell Culture Specialist

RESPONSIBILITIES

- May be involved in all stages of production process maturity (from development or acquisition to continuous commercial Good Manufacturing Practice (GMP) production) and follow up of closed projects.
- Manage production process of your project but may be involved in several projects simultaneously.
- Must deal with equipment, technology and operations, and have very good comprehension of the process and critical parameters.
- Create and ensure follow-up and finalization of instructions/forms/protocols related to the production process for hierarchy approval.
- Responsible for daily organization of performed production processes and associated GMP requirements, i.e., clean, environment monitoring (EM).
- Complete assigned key performance indicators (KPIs).
- Document Deviations and Curative and Preventive Actions (CAPA) for hierarchy approval.
- Check the material availability as needed and inform appropriate party when stock of material is low.
- Immediately advise Manager of relevant problems or failures.
- Post production, prepare all GMP documentation for hierarchy approval.
- Respect environmental health and safety (EHS) rules in working area.
- Must be highly qualified/trained to work in A/B environment.

SKILLS/QUALIFICATIONS

- Well Versed in Cell Culture and GMP Aseptic Environment.
- Cell Therapy Specific Context.
- Quality-Minded.
- Rigorous.
- Continuous Improvement Driven.
- Organized.
- Able to Multi-Task.
- Flexible.

- Autonomous.
- Medical Teamwork.

EDUCATION/EXPERIENCE

- Bachelor's Degree in Biology, clinical Chemistry or relevant experience in the fields of Biotech/Pharma/Cell Therapy.
- Experience in GMP environment or equivalent experience in University non-GMP CORE training or training facility.
- Experience in cell culture and aseptic manipulations.
- Experience in human cells cultivation preferred.
